МЕТОДИЧЕСКАЯ РАЗРАБОТКА

2017

Пояснительная записка

Игра является методом обучения, который направлен на моделирование реальной действительности с целью принятия решений в моделируемой ситуации, ее основной целью является углубление интереса к учебе, и, тем самым, повышение эффективности обучения. Игра имеет такое же значение в жизни молодого человека, какое у взрослого производственная деятельность, работа. Внешне кажущаяся беззаботной и легкой, на самом деле, игра требует у подростка отдачи максимума своей энергии, ума, выдержки, самостоятельности.

Игры очень хорошо уживаются с «серьезным» учением, включение их в урок делает процесс обучения интенсивным и занимательным, создает у учащихся бодрое рабочее настроение, облегчает преодоление трудностей в усвоении учебного материала. Разнообразные игровые действия, при помощи которых решается та или иная умственная задача, поддерживают и усиливают интерес к учебному предмету. Каждому педагогу необходимо использовать все возможности для того, чтобы его ученики учились с интересом, осознали и испытали притягательные стороны информатики, ее возможности в совершенствовании умственных способностей, в преодолении трудностей.

Игры можно использовать как на уроке, так и во внеурочной деятельности обучающихся, кроме того, возможно их проведение в интеграции с другими предметами.

Цели и задачи проведения внеклассного мероприятия:

- практическая – систематизировать и обобщить знания учащихся по теме «Англоязычные страны»;
- образовательная – расширить кругозор учащихся; формировать у них интерес к культуре народов стран изучаемого языка;
- воспитательная – создать положительную мотивацию к дальнейшему изучению языка;
- развивающая – совершенствовать у учащихся память, воображение, внимание, логическое мышление, способность к догадке.

План мероприятия:

Оснащение урока: географическая карта, флаги англоязычных государств, иллюстративный и дидактический материал, кубик
